

DIY or Fully Fitted

If you wish to take advantage of our very competitive products but do not feel confident enough to undertake the makeover of your kitchen or bedroom yourself there are a couple of options open to you.

First, if you contact us with your postcode we will endeavour to recommend a suitably qualified carpenter in your area. He will be experienced in installing our products and may offer you a supplied and fully fitted solution. The advantage of this is that we don't have high pressure salesmen for you to deal with but local experienced tradesmen. It also means that the responsibility of the project would be pass from you to the tradesman. For this service, risk and responsibility he will add up to 20% onto our internet trade prices plus charge for fitting. Please use our contact us form or phone us directly to make an appointment.

Second, of course, you may well have or know of a good carpenter local to you that you would prefer to use. We suggest you involve him early on in the project thereby getting 'buy in' to your solution and ideas. This will be the most cost advantageous to you as you can still purchase products directly from us at trade prices and pay him for his labour only. Bear in mind, however, that it does mean you are responsible for the project. Also, we will be happy to provide him or her with telephone support while they are fitting your kitchen or bedroom.
